Resolve complex technological issues
Complete multiple tasks at a time to help everyday business
Work alongside high-level software developers

EXTRA CURRICULAR

2017 – Present **Lead Software Developer** for Grand Valley's Esports Team

2017 – 2019 **Student Ambassador** for Grand Valley State University

PROJECTS

TouchLog (Internship Logging Website), Winter 2020

Developed a web app to log internship hours for students taking Grand Valley's internship class. This website is made in Angular 9 with a NodeJS backend and MongoDB database. This also uses PassportJS for authentication.

Grand Valley Esports Website (gvesports.org), Fall 2019

Designed an interactive and informative website for Grand Valley's Esports team to host information about the club. This website is created with an Angular 9 front end and a NodeJS backend. This also uses Discord's OAuth2 authentication.
